

Drought Preparedness Checklist

- 01.** Inspect your property's most sensitive areas for damages, such as your:
 - Foundation and structural supports
 - Basement
 - Crawl space
 - Concrete slabs around your property
- 02.** Review your community's history of drought conditions
- 03.** Stay informed about possible drought effects in your area
- 04.** Create a list of local, state, and federal resources
- 05.** Understand your community's water supply
- 06.** Consider water conservation methods such as:
 - Repairing leaky faucets and pipes
 - Taking shorter showers
 - Install water-saving appliances
 - Turn off the tap while brushing your teeth
 - Water your lawn at most once a week
- 07.** Contact a waterproofing and foundation repair professional if damages are present
